

Dear Sir:

I am writing to ask that you ban antibiotics used to promote growth in farm animals. Due to its use I feed my family no animal products and keep only organic eggs and milk.

I am sure you are aware of the dangers increase in conditions that no longer respond to antibiotics due to the immunity resulting from the over use, mostly in food. People are dying from diseases and viruses which were once curable. I do not think you want to be seen as responsible for these deaths, but you are.

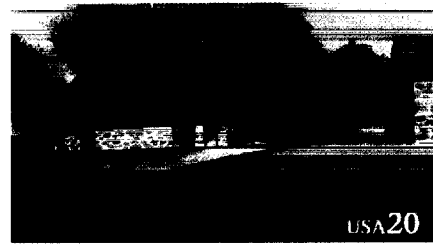

Sincerely yours,
Marilyn B. Meyers
